

Exercise 1

Create- Insert – Update - Delete

Write SQL statements to do the following:

1. Create a Database called **Football** and create a table called **premiership** in Football database;

Add 3 x fields

Team – Varchar (50)

Played – Int (11)

Points – Int (11)

Team will be the Primary Key

2. Insert the following records into the premiership table.

Team	Played	Points
Juventus	12	34
Man Utd	11	29
Barcelona	10	25
Liverpool	12	23
Arsenal	14	26

3. Update the premiership table as follows:
 - Change the name Juventus to Napoli
 - Change the No of games played by an extra 2 for all teams
4. Show full details of all teams who have played more than 12 games and have less than 30 points
5. Delete Arsenal from the table
6. Delete all records from the Table
