

# Computer & Network Forensics

## Week 5 (Lab3) – Report

### Introduction to Forensics Analysis using FTK

---

#### FTK Forensic Analysis Report

**Name:** Danyil Tymchuk

**Date:** 13/10/2025

**Case Name:** FTK Lab

**Tool Used:** AccessData Forensic Toolkit (FTK)

- **For Investigate Findings:** Internet Archive ([archive.org](https://archive.org)), Microsoft Excel and Windows Notepad

#### Introduction

This report documents the digital forensic examination of a sample image file (ftk-demo1-image.1) performed using AccessData Forensic Toolkit (FTK) between 13 October 2025 and 17 October 2025.

The purpose of this analysis was to identify, recover, and interpret digital evidence relating to potential financial misconduct and data concealment by two suspects, George Jones and Martha James, Steve Billings's employees.

All evidence was analyzed in accordance with standard digital forensic procedures, ensuring the preservation of data integrity and maintaining a clear chain of custody.

The analysis focused on uncovering encrypted communications, deleted files, and hidden financial records that could demonstrate intent to defraud or conceal company funds.

#### What am I doing?

- Locate and recover deleted files from the provided forensic image.
- Analyze email and text communications between involved parties for indications of collusion or fraudulent activity.
- Identify and decrypt password-protected files / archives.
- Correlate digital findings with physical evidence and metadata.
- Document all forensic procedures and maintain evidentiary integrity throughout the analysis.

## Contents

### **Computer & Network Forensics**

- FTK Forensic Analysis Report
  - Introduction
  - Contents
  - Objective
  - Discovery of Evidence
  - Chain of Custody
  - Summary of Collected Evidence
  - Findings
    - Evidence #1 Encrypted Message File
    - Evidence #2 Image Containing Questioning Message
    - Evidence #3 Email Correspondence Between George and Martha
    - Evidence #4 Deleted Text Messages
    - Evidence #5 Message From Bank
    - Evidence #6 Encrypted Zip Archive Containing Swiss Bank Records
  - FTK Case Report (generated)
  - Conclusion

## Objective

By following these guidelines and documenting my forensic analysis thoroughly, I will create a credible and informative forensic report. This report will not only serve as a record of my investigation but also as a valuable resource for presenting my findings and insights to others involved in the case.

1. Methodical Approach: Begin your investigation with a systematic and methodical approach. Carefully consider the objectives of your analysis and the questions you seek to answer. Remembering 5W-H from lecture-1
2. Document Everything: Maintain detailed records of each step you take during the investigation. Record the tools and software used, the files examined, and the actions performed. Be sure to timestamp your activities to establish a timeline of your investigation.
3. Screenshots: Screenshots are invaluable for documenting your actions and the state of the evidence at various points in the investigation. Capture screenshots to illustrate significant findings, folder structures, and any anomalies you encounter. These visual aids enhance the comprehensibility of your report.
4. File and Folder Organization: Keep your files and folders organized. Create a structured directory where you can store your documentation, screenshots, and any reports you generate during the investigation. This ensures that your findings are easily accessible and well-organized.
5. Analysis and Findings: As you examine files and uncover evidence, document your findings thoroughly. Include relevant information such as file names, timestamps, and any text or data extracted from the evidence. If you encounter any suspicious or noteworthy items, make a note of them.
6. Maintain Chain of Custody: If applicable, ensure the chain of custody for the digital evidence is preserved. Document who had access to the evidence and when, as well as any actions taken by individuals involved in the investigation.
7. Report Compilation: After completing your analysis, compile a forensic report that encapsulates your investigation process, findings, and conclusions. The report should be clear, concise, and organized. Include relevant screenshots and references to evidence.

## Discovery of Evidence

### In the case of George Montgomery, Steve found:

- Three unused vape devices.
- Links to online gaming websites.
- Tik-Tok search for “hard drive wipe”.
- Google Search for “Cat Adoption Dublin”.
- Microsoft Bing Search “florist in Blanchardstown”.
- Google Translate with text translated from French.
- Access to a website regarding Geneva.
- Handwritten documents (one displayed below) relating to a supplier based in Switzerland with whom Steve himself had previous dealings.

Steve had his IT person access the PC used by George and they discovered all data on the C/Drive and Cloud had been deleted by George. Additionally, a Memory Stick labelled with the former supplier's name and a 4-digit code (2398) was discovered taped under the desk used by George.

## Chain of Custody

Date / Time	Action	Handled By
13/10/2025 – 15/10/2025	Analysis Period	Danyil Tymchuk
17/10/2025 09:00 – 12:00	Case Closure	Danyil Tymchuk

## Summary of Collected Evidence

Evidence No.	File Name / Type	Description	Relevance
1	!_Y.EXE (deleted)	Deleted message referencing missing funds and Zurich meeting; password clue.	Establishes intent and encryption method.
2	!AF6.JPG (deleted)	Image with message from Martha expressing concern.	Confirms awareness and complicity.
3	g-021218.msg, g-021220.msg, g-021229.msg, g-021230.msg	Email conversation between George and Martha discussing "a plan."	Indicates coordination and secrecy.
4	msg4.txt (deleted), msg5.txt (deleted), msg7.txt (deleted)	Deleted text messages about embezzlement and offshore transfers.	Confirms fraud, intent to conceal.
5	mt_bank_secrecy.htm	Message confirming password "couch" and Isle of Man bank link.	Links to offshore account and encryption.
6	X.ZIP (encrypted) [SWISS.XML, SWISS.TXT, SWISS.CSV] (encrypted)	Encrypted ZIP with Swiss financial statements (Account No. 9882111).	Proof of hidden assets totaling about \$3.9M.

## Findings

### Evidence #1 Encrypted Message File

The screenshot shows the AccessData FTK interface. The top navigation bar includes File, Edit, View, Tools, Help, Overview, Explore, Graphics, E-Mail, Search, and Bookmark. The main window displays a file tree under 'Case' with 'ftk-demo1-image' selected. Inside are 'CHAPTER 5-FAT12' and 'work'. The 'work' folder contains several files: 'Mige.Dr.', 'deposits...', '3 Hurry...', and 'Martha...'. Below the tree is a 'List all descendants' table with columns: File Name, Full Path, Recycle Bl., Est. File Type, Category, Subject, Cr Date, Mod Date, Acc Date, L-Size, P-Size, Children, Descen..., Enc, Del, Recyc, Crv, Ids, Sector. The table lists numerous files, many with 'Unknown' file types and categories like 'Unknown.FL.' or 'Unknown.Folder'. A large portion of the table is cut off on the right.

**Timestamp:** 13/10/2025 23:54:52

**File Name:** !\_Y.EXE

**Full Path:** ftk-demo1-image\CHAPTER 5-FAT12\work\ !\_Y.EXE

**File extension:** EXE – Executable File (contains embedded text message)

**MAC:** (Cr) 02/15/2003 15:39:16 (Mod) 02/15/2003 14:40:34 (Acc) 02/15/2003 00:00:00

**Description:**

Upon examination of the file ' !\_Y.EXE', FTK revealed a hidden or embedded text message between Martha and George. The message indicates an attempt to conceal financial information by encrypting data and planning to flee the country.

**The decrypted content (visible in FTK's text view) reads in part:**

*"I encrypted this file so as to prevent anyone from reading them. If I have to flee when the auditor finds the missing money, you can meet me in Zurich on the 19th of January... The password is the 10th word in the right column on page 263 of the Merriam Webster's Collegiate Dictionary, 10th edition."*

**Analysis:**

The message suggests deliberate concealment of data and coordination between Martha and George to avoid detection. The reference to an encryption password hidden in a physical dictionary implies premeditation and an effort to hide information outside the digital domain.

### Relevance:

This file is a critical piece of evidence, as it directly references:

- The missing money is under investigation.
- A planned escape to Zurich, suggesting intent to flee.
- An encryption scheme used to hide incriminating data.
- A potential password ("couch") for decrypting other evidence files.

### Merriam Webster's Collegiate Dictionary, 10th edition

Found this book on Internet Archive:

<https://archive.org/details/merriamwebstersc01merr>

When checked, the 10th word in the referenced dictionary page corresponds to "**couch**", which may serve as the decryption password for the encrypted files found in the same evidence folder.

## Evidence #2 Image Containing Questioning Message

File Name	Full Path	Recycle Bl...	Ext	File Type	Category	Subject	Cr Date	Mod Date	Acc Date	L-Size	P-Size	Children	Descen...	Enc	Del	Recyc	Crv	Idx	Sector

**Timestamp:** 14/10/2025 00:05:07

**File Name:** !AF6.JPG

**Full Path:** ftk-demo1-image\CHAPTER 5-FAT12\work\!AF6.JPG

**File extension:** JPG – JPEG image (Graphics)

**Description:**

The image file !AF6.JPG contains a short textual message from Martha to George.

**The visible text reads:**

**“George**

**Are you sure you know what you are doing. Isn't it dangerous, won't you get caught?**

**Martha”**

**Analysis:**

Although brief, this image provides direct evidence of Martha expressing concern about George's actions. The phrasing implies that Martha was aware of potentially risky or illicit behavior and feared detection.

**Relevance:**

This evidence establishes:

- Corroborates earlier communications showing Martha and George discussing a clandestine plan.
- Demonstrates Martha's awareness and possible complicity, or at least her knowledge of the risky nature of the activities.
- Adds a human/contextual element to the technical evidence.

## Evidence #3 Email Correspondence Between George and Martha

The screenshots show four windows of the AccessData FTK software. Each window displays a list of emails from the 'Personal\Messages' folder. The emails are from George Jones (georgej@widgets\_intl.com) to Martha James (marthaj@widgets\_intl.com). The subjects of the emails include "I have a plan to pay for our vaction next Spring. I'll tell you about it later.", "What kind of plan do you have to get the money for the mountain vacation you want so badly?", "I can't talk about it now, it will have to wait until we can talk in private. Maybe Year's Eve.", and "What are you talking about, what's the big deal?". The dates of the emails range from December 18, 2001, to December 30, 2001.

**Timestamp:** 14/10/2025 00:06:52

**Full Path:**

- ftk-demo1-image\CHAPTER 5-FAT12\personal\Messages\g-021218.msg
- ftk-demo1-image\CHAPTER 5-FAT12\personal\Messages\g-021220.msg
- ftk-demo1-image\CHAPTER 5-FAT12\personal\Messages\g-021229.msg
- ftk-demo1-image\CHAPTER 5-FAT12\personal\Messages\g-021230.msg

**File extension:** msg – Microsoft Outlook Message Files

**Date Range:** 18 December 2001 – 30 December 2001

**Description:**

A series of internal email messages were recovered between George Jones (georgej@widgets\_intl.com) and Martha James (marthaj@widgets\_intl.com) discussing what George refers to as “*a plan*”.

- 18 & 26 Dec 2001: George writes, “*I have a plan to pay for our vaction next Spring. I'll tell you about it later.*”
- 20 Dec 2001: Martha replies, “*What kind of plan do you have to get the money for the mountain vacation you want so badly?*”
- 29 Dec 2001: George responds, “*I can't talk about it now, it will have to wait until we can talk in private. Maybe Year's Eve.*”
- 30 Dec 2001: Martha follows up, “*What are you talking about, what's the big deal?*”

**Analysis:**

These emails demonstrate an ongoing private conversation between the two employees regarding a financial plan that George was unwilling to discuss electronically.

The phrase “*plan to pay for our vacation*” and the insistence on discussing it “*in private*” suggest that the plan may have been illicit or confidential, likely connected to the missing funds mentioned in other evidence.

The timing of the emails – late December 2001 – aligns closely with the period leading up to the Zurich meeting mentioned in the encrypted note, reinforcing their involvement in coordinated activity.

**Relevance:**

This evidence establishes:

- A personal and confidential relationship between Martha and George.
- Early discussion of financial matters prior to the disappearance of funds.
- Evidence that both parties were aware and involved in a possible scheme.

**Evidence #4 Deleted Text Messages**

**Timestamp:** 14/10/2025 00:08:38

**Full Path:**

- ftk-demo1-image\CHAPTER 5-FAT12\work\msg4.txt (Deleted)
- ftk-demo1-image\CHAPTER 5-FAT12\personal\Messages\msg5.txt (Deleted)
- ftk-demo1-image\CHAPTER 5-FAT12\personal\Messages\msg7.txt (Deleted)

**File extension:** txt – Plain text

*msg4.txt — excerpt / description*

**Excerpt:**

*“Dear Martha, Here it is June I have almost deposited a million dollars. If I can get away with this I'll be able to have two million in the Isle of Man bank account by xmas time. more later, devo tedly yours, George”*

**Description & Analysis:**

This deleted file is a direct admission of large-scale embezzlement or misappropriation. The author (George) states he has deposited approximately one million dollars and plans to move funds to an Isle of Man bank account, indicating concealment of assets offshore. This is corroborative of the encrypted note and the email correspondence that mentioned a private “*plan*”.

**Relevance:**

Strongly indicates illegal diversion of funds and intent to conceal proceeds overseas. Highly probative for the investigation.

*msg5.txt — excerpt / description*

Excerpt:

*“...I've got a plan to get more cash. It involves rerouting invoices here at work to the field offices. It will take six months to get back here and we can be in Brazil enjoying the fruits of our labo...”*

Description & Analysis:

This deleted message contains an operational description of how George intended to divert company funds – specifically, rerouting invoices to field offices to siphon money over time. The mention of a six-month timeframe and escape to Brazil indicates planning and premeditation.

Relevance:

Provides a likely method of the fraud (invoice rerouting) and timeline for the scheme; useful for correlating with accounting records, invoice logs, and network/access timestamps.

*msg7.txt — excerpt / description*

Excerpt:

*“...I encrypted this file so as to prevent anyone from reading them. If I have to flee when the auditor finds the missing money, you can meet me in Zurich % on the 19 of January. yours devotedly, Ge + orge ,”*

Description & Analysis:

This deleted file is essentially the same content as the previously noted *!\_Y.EXE* message and reaffirms: (1) encrypted deposits exist, (2) a contingency plan to flee, and (3) a rendezvous in Zurich on 19 January. This file confirms coordination and contingency planning between George and the co-conspirator (Martha).

Relevance:

Corroborates earlier evidence (*!\_Y.EXE* message and email thread) and strengthens the inference that encryption and planned flight were part of the scheme.

## Evidence #5 Message From Bank

The screenshot shows a Windows desktop environment with a file explorer window open. The path is 'ftk-demo1-image\CHAPTER 5-FAT12\account\data\mt\_bank\_secrecy.htm'. The file 'mt\_bank\_secrecy.htm' is selected. Below it, a preview pane displays the following text:

```

Mr. Jones,
The password for your account is: couch
Please let us know if you need anything else.
Regards,
Sigor Krautfeltz
Isle of Man Saving & Loan

```

At the bottom of the preview pane, there is a note: 'The file mt\_bank\_secrecy.htm is a Hypertext Document.'

**Timestamp:** 14/10/2025 00:14:36

**File Name:** mt\_bank\_secrecy.htm

**Full Path:** ftk-demo1-image\CHAPTER 5-FAT12\account\data\mt\_bank\_secrecy.htm

**File extension:** htm – Hypertext Document

**Description:**

This file is an email-style message addressed to Mr. Jones (George Jones).

**The text reads:**

*"Mr. Jones,*

*The password for your account is: couch*

*Please let us know if you need anything else.*

*Regards,*

*Sigor Krautfeltz*

*Isle of Man Saving & Loan”*

**Analysis:**

This message confirms that the account password is couch, matching the dictionary clue found in the encrypted !\_Y.EXE file. The sender, Sigor Krautfeltz, appears to represent the Isle of Man Saving & Loan, which aligns with the previously recovered deleted message (msg4.txt) referencing the transfer of over one million dollars to an Isle of Man bank account.

This demonstrates a direct link between George Jones and an offshore bank, and verifies that couch was the legitimate password used for his account. It also provides clear evidence that the parties were attempting to hide funds overseas, confirming the suspicions raised by other evidence (emails, deleted notes, and encrypted files).

### Relevance:

- Confirms “couch” as the password to the offshore account.
- Connects George Jones directly to the Isle of Man Savings & Loan institution.
- Corroborates statements in earlier deleted files (*msg4.txt* and *!\_Y.EXE*).
- Provides strong evidence of financial concealment and fraudulent intent.

### Evidence #6 Encrypted Zip Archive Containing Swiss Bank Records

The screenshot shows the AccessData FTK interface with the following details:

- File List:** X.ZIP contains three files:
  - SWISS.XLS (18,431 bytes, modified 2/15/2003 11:46 AM)
  - SWISS.TXT (2,428 bytes, modified 2/15/2003 11:47 AM)
  - SWISS.CSV (2,428 bytes, modified 2/15/2003 11:46 AM)
- File Details:** A large table below lists all files found in the archive, including their full path, file type, category, subject, creation date, modification date, access date, size, and other metadata.
- CSV Preview:** The bottom pane displays the first few rows of the SWISS.CSV file, showing columns for Date, Type, Description, and Amount.

**Timestamp:** 14/10/2025 00:18:28

**File Name:** X.ZIP

**Full Path:** ftk-demo1-image\CHAPTER 5-FAT12\account\data\x.zip

**File extension:** ZIP – Compressed Archive

**Contained Files:**

- SWISS.XML
- SWISS.TXT
- SWISS.CSV

**Encryption:** Password-protected; successfully opened using password “couch” derived from prior evidence (*bank\_secrecy.htm* and *!\_Y.EXE*).

*Description:*

The archive X.ZIP contains three files — SWISS.CSV, SWISS.TXT, and SWISS.XLS — all detailing financial transactions in a Swiss bank account identified as:

- **Account Number:** 9882111
- **Institution:** Geneve Internationale (Geneva International)
- **Currency:** USD (United States Dollars)

Each record lists deposits, interest accrued, and running totals between January 2002 and December 2004, entirely in French. The columns include:

<b>Deposit Amount (USD)</b>	<b>Total Balance (USD)</b>	<b>Interest Earned</b>	<b>Deposit Date</b>
\$1,524.00	\$1,623.56	\$99.56	29 Jan 2002
\$15,888.00	\$18,655.59	\$1,037.96	14 Feb 2002
...	...	...	...
\$68,945.00	\$3,898,678.00	\$4,504.18	4 Dec 2004

Over time, the deposits and interest show a steady increase in balance, reaching approximately \$3.9 million USD by late 2004.

*Analysis:*

This encrypted archive directly corroborates statements found in earlier deleted files (*msg4.txt* and *msg5.txt*), where George Jones described secretly depositing money and transferring funds to a bank account in the Isle of Man and Switzerland.

The reuse of the password “couch” across multiple files demonstrates a consistent security practice and links the same user to both the offshore communication and these financial transaction records.

The French-language data and Geneva references suggest the use of an international intermediary, possibly to disguise the funds’ origin.

The account number 9882111 appears multiple times and is likely tied to the fraudulent deposits discussed in prior messages.

*Relevance:*

- Confirms the existence of offshore accounts used to hide embezzled funds.
- Matches amounts and timeline mentioned in deleted communications.
- Connects George Jones to Swiss and Isle of Man banking activity.
- Provides concrete numerical evidence of financial misconduct and money laundering.

X.ZIP → [ SWISS.XLS SWISS.TXT SWISS.CSV ]

After unzipping an encrypted X.ZIP file with "couch" password, I opened contained files (SWISS.XLS, SWISS.TXT, SWISS.CSV) using Microsoft Excel and Windows Notepad.

It seems like all these three files contain the same data, but in different formats.  
(Bank Statements)

## Google Translate Activity

The screenshot shows a Google Translate window. On the left, a text input box contains the French sentence "Les montants ont énumérés en des dollars des Etats-Unis". On the right, the English translation "Amounts listed in US dollars" is displayed. The interface includes language detection ("French - Detected"), a toolbar with Text, Images, Documents, and Websites options, and a bottom bar with English, Spanish, and Arabic buttons.

Browser activity shows use of Google Translate to convert French text to English.  
One translation recorded is:

"*Les montants ont énumérés en des dollars des États-Unis*" →  
"Amounts listed in US dollars"

This phrase exactly matches a line appearing in the decrypted SWISS.XLS (TXT/CSV) file found inside X.ZIP.

The translation activity demonstrates that the user (likely Martha or George) was attempting to understand the French-language Swiss financial documents, confirming awareness of the contents and intentional access to the hidden bank data.

## Webpage Related to Geneva

### Website regarding Geneva

The screenshot shows a webpage from the website of the Permanent Mission of Switzerland to the United Nations Office in Geneva. The header includes the logo of the Swiss Confederation and the text "Permanent Mission of Switzerland to the United Nations Office and to the other international organisations in Geneva". The main content area features sections titled "International Geneva", "Sources of information", and "Discovering International Geneva". The "International Geneva" section contains links to "Facts and figures about International Geneva", "Platforms for cooperation", and "International Geneva Welcome Centre (CAGI)". The "Sources of information" section describes a series of thematic resources and useful links related to International Geneva. The "Discovering International Geneva" section highlights various opportunities for guided tours and visits of its institutions and iconic places and buildings.

A visited webpage referencing "Geneva" and "Switzerland" was identified, consistent with the bank title "Geneve Internationale" found in SWISS.XLS (TXT/CSV).

This suggests research or interaction with the Swiss financial institution hosting the illicit account.

Combined with translation activity, it shows the suspects were actively verifying and managing offshore financial information from their work environment.

*Handwritten Note (Physical Evidence)*

**Handwritten note**

**Recovered Text:**

"A/c 988211"

*Check under the couch*

*Flowers sent to the "Cat"*

*Swiss cheese x G.M."*

This physical note directly correlates to multiple digital findings:

- **"A/c 988211"** → Matches the Swiss bank account number in SWISS.CSV.
- **"Check under the couch"** → References the password "couch", used to decrypt X.ZIP.
- **"Swiss cheese x G.M."** → "G.M." likely refers to George Montgomery/Jones, confirming authorship or intended recipient.
- The mention of "Cat" and "Flowers" may correspond to browser searches for "Cat Adoption Dublin" and florist pages, indicating possible use of personal communications as code or cover phrases.

The handwritten note acts as physical corroboration for the digital evidence.

It establishes:

- The same account number and password.
- A clear link between offline planning and digital concealment of funds.
- Awareness and coordination between George and Martha.

## FTK Case Report (generated)

The screenshot shows the FTK Evidence List window. The left sidebar contains navigation links: Case Summary, Case Information, File Overview, Evidence List, Supplementary Files, Case Log, List by File Path, MS Access database, and List File Properties. The main content area displays the following details:

Comment: password "couch"

AccessData Forensic Toolkit

## Conclusion

The forensic investigation revealed substantial evidence of financial fraud, encryption concealment, and offshore account management between George Jones and Martha James.

Recovered files, deleted communications, and decrypted archives collectively indicate the unauthorized transfer of company funds to Swiss and Isle of Man bank accounts, totaling approximately \$3.9 million USD by 2004.
