# **Web Development Client Side**

# Week 1 - Lab Revision

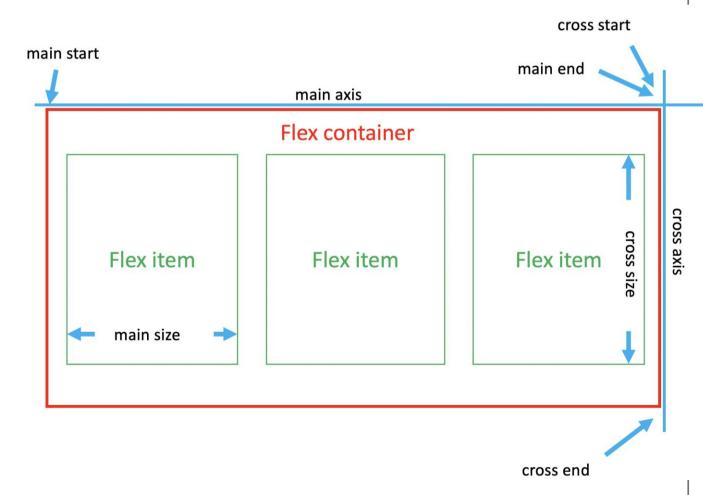

# **Objective:**

The purpose of this lab session is to create a web page that includes topics for revision, flex boxes, links and images.

### **Exercise 1:**

Create a folder WebDevCS and create weekly lab folders within this folder, eg lab1, lab2 etc Create a web page with flex box, images, links and a nav bar.

The files should be named Lab1.html, Lab1.css

In the body of the html document insert a **<main>**. This will serve as your flex container for this page. Flex items are how we refer to the child elements located inside the flex container. Inside the flex container insert three flex items using div tags.

You first flex item should have the class *flex1* and should include 1 heading "Flex item 1", followed by 2 paragraphs of text (use Lorem Ipsum.com)

You second flex item should have the class *flex2* and should include 1 heading "Flex item 2", followed by 1 paragraph of text (use Lorem Ipsum) and the kingfisher.jpg image from the images folder.

You third flex item should have the class *flex3* and should include 1 heading "Flex item 3", followed by 2 paragraphs of text (use Lorem Ipsum).

### Your webpage should now look like this (zoomed out 50%):

#### Flex Item 1

Loren igens older at some, connection management adjusting (th. Clean correllation is a register missioned Planewar at some as define depart facilities. Seed from management and as a continue management of the management of the management and as a continue management and as a

#### Flow Itom 2

#### Flex Item 3

Politocopes in histories results training was instructed annument or transferrance dispersant formers to report for the propert of properties of public results of the properties actually. Clears notice during expense and public results and expense and public results actually. Clears actually actu

# Styling your page

Ensure that the image width is set to 100% in the CSS.

Set the main flex container to:

background-color: lightgray;

margin: .6rem;

padding: .6rem;

Set the flex items to:

margin: 1rem;

padding: 1rem;

Set each flex item to have a different color of background like this

The colours you see here are lightcyan, lightcoral, and lightsteelblue.

### Flex Item 1

Lorem jaunu dolor sit amet, consectetur adipiscine jelli. Cras convallis orci at egestae culismod. Praesent at nune ac dolor aliquet facilisis deed mine nim, matimus a accumsan noe, interdunt vitae leuts. Morbi ut massa esd risus maximus port act a cubil. Orci virustus natoque penatibas et magnis dis parturient montes, nascetur ridiculus mus, Quisque consectetur orci nec vestibulum porta. Sed cross urna, posuer meridete urna, nacidi efficiaria vila. Curabilor fringili visual palque tale palaceres est ante. Curabilor portitie urna que a presenta de la consecuencia del consecuencia del

Aenean finibus sodales ornare. Aenean viverra isculis faucibus. In viverra pharetra quam tincidunt maximus. Vestibulum consecteur trisengres aguits. Saspendisse tempor ligula nisi, porta laoreet dolor vestibulum id. Suspendis ornare sod loo vel laoreet.

### Flex Item 2

Of Irrigate tempor etc., a unaumorpet traign to majeste ca sujetancies ecientes an afra traitor fore sourcinamia entere entere a femera entere entere

#### Flex Item 3

Pellentesque habitant morbi tristique senectus et nuits et malessuda fame ac turpis egestas. Cras ultricies veit a condimentum imperdiet, (vinams veit magas, aliquame dolor eget, dignissim dignissim forme. Sed consecture d'fictiur isculie. Cras totor dolor, cgestas lapibus maximus a, maximus outellus. Mauris el lectus et est commodo pellentesque. Aliquam sagitis interdum ex. Maccenas voltaput error garvida efementum sucique. Phaselisti vultipatate loborits magas que franchas. Morbi atte elli, fanchos congre mones at, fanchus sucults fells. Dais frequir justo in facilisis vultjutate. Donne volutpat eleifend lacus, eget ornare est lacinia volutpat. Sed lectus veilt, incidunt non tibb i, chonous varias una comit.

Fusce fringilla daphas erat, signifis pellentesque acru daphus et. Donce ac cursus ex. a placent augue. Vivanus efficitur at risus a alquet. Praesent eleifend justo sed nulla viverra vestibulum. Vestibulum suscipit mi vel turpis sodales consectetur. Cras varius tempor neque si phaetera. Sed sollicitudin orsi sapien. Suspendisse in lorem eget dui malesuada fermentum ut ut velli. Integer fecupiat dui et pellentesque tristique. Sed sit amet occi dictum, gravida enim vel, pulvinar diam. Nulla eleifend nibh id volutpat dictum. Integer non vell prettum, imperfeit quam ut, sodales cit.)

### **Insert Flex Rules**

It is time to insert the two CSS properties that will turn the layout into a flex layout. The flex property *display* is used to turn a normal layout into a flexbox layout. It should be applied to the flex container.

# display: flex;

The flex property *flex* can be applied to the flex items to determine what proportion of space each flex item takes up.

### flex:1;

Apply the flex property to each of your flex item so that the that .flex2 takes up twice as much space as .flex1 or .flex3 (see lecture notes). The page should look something like the image below:

#### Flex Item 1

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Cras convallis orci at egestas euismod. Praesent at nunc ac dolor aliquet facilisis. Sed enim enim, maximus a accumsan nec, interdum vitae lectus. Morbi ut massa sed risus maximus porta et ac nibh. Orci varius natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus. Quisque consectetur orci nec vestibulum porta. Sed eros urna, posuere imperdiet urna in, iaculis efficitur velit. Curabitur fringilla vulputate leo, aliquam aliquet nulla posuere sit amet. Curabitur portitior urna massa, vitae venenatis turpis pharetra eu. Integer sagittis aliquet elit dictum consectetur. Maecenas neque lectus, ultricies ultrices fleis nec, ultrices sagittis enim. Integer portitior rutrum tortor, sit amet malesuada metus elementum sed. Vestibulum ante ipsum primis in faucibus orci luctus et ultrices posuere cubilia Curae; Integer quis convallis elit. Fusce vitae ex pharetra, portitior nisi ac, vehicula quam.

Aenean finibus sodales ornare. Aenean viverra jaculis faucibus. In viverra pharetra quam tincidunt maximus. Vestibulum consectetur semper sagittis. Suspendisse est enim, consectetur at libero dictum, faucibus finigilla tellus. Maecenas eget mattis justo. Aliquam quis tempor risus. Nam accumsan convallis tellus at facilisis. Suspendisse tempor ligula nisi, porta laoreet dolor vestibulum id. Suspendisse ornare sed leo vel laoreet.

#### Flex Item 2

Ut fringilla tempor ex, a ullamcorper turpis molestie eu. Suspendisse eleifend sit amet libero nec sollicitudin. Mauris nec neque facilisis, scelerisque libero ut, posuere turpis. Ut est quam, placerat id vehicula ut, cursus vel nulla. Integer ac dignissim erat, id egestas metus. Fusce tincidunt, odio sed rhoncus feugiat, elit sapien interdum ipsum, nec mattis elit lorem non arcu. Nulla ullamcorper, ante quis vehicula tincidunt, est orci feugiat ligula, a pulvinar ipsum erat quis eros. Pellentesque et nisi nisl. Morbi sit amet mi tempus, convallis risus eget, efficitur ipsum. Vivamus fermentum mauris nulla, sed suscipit lacus fringilla sit amet. Phasellus sit amet diam eget eros condimentum varius. Morbi bibendum orci sit amet sapien aliquet, eu fermentum mi varius.

### Flex Item 3

Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Cras ultricies velti a condimentum imperdiet. Vivamus velti magna, aliquam et dolor eget, dignissim velti magna, aliquam et dolor eget, dignissim dignissim lorem. Sed consectetur efficitur iaculis. Cras tortor dolor, egestas dapibus maximus a un tellus. Mauris et lectus et est commodo pellentesque. Aliquam sagittis interdum ex. Maccenas volutpat eros gravida elementum suscipit. Phasellus vulputate lobortis magna eget faucibus. Morbi ante elit, faucibus conque rhoncus at, faucibus sit amet justo. Pellentesque ac justo egestas velti rhoncus tincidunt. Vestibulum augue ipsum, sollicitudin sit amet dui non, fermentum iaculis felis. Duis feugiat justo in facilisis vulputate. Donec volutpat eleifend lacus, eget ornare est lacinia volutpat. Sed lectus velit, tincidunt non nibh id, rhoncus varius urna.

Fusce fringilla dapibus erat, sagittis pellentesque arcu dapibus et. Donec ac cursus ex, a placerat augue. Vivamus efficitur at risus a aliquet. Praesent eleifend justo sed nulla viverra vestibulum. Vestibulum suscipit mi vel turpis sodales consectetur. Cras varius tempor neque id pharetra. Sed sollicitudin orci sapien. Suspendisse in lorem eget dui malesuada fermentum ut ut velit. Integer feugiat dui et pellentesque tristique. Sed sit amet orci dictum, gravida enim vel, pulvinar diam. Nulla eleifend nibh id volutpat dictum. Integer non velit pretium, imperdiet quam ut, sodales elit.

Copy and paste the contents of your document into the CSS validator at <a href="https://codebeautify.org/cssvalidate">https://codebeautify.org/cssvalidate</a> and ensure there are no errors in your code.

When you are happy that your code is error-free save your HTML file.

Modify the exercise to create a web page for Birdwatch Ireland.

The page should contain a header 'Birdwatch Ireland' and a footer with 'Contact Details'.

It should display a horizontal nav bar underneath the header with the following options:

- Home
- Our Work
- Publications
- Gallery
- Contact Us
- Site Map

Use appropriate colors for the nav bar and provide a change of color for mouse overs.

When the user clicks on the image it should go to the birdwatch Ireland website.

Use the HTML and CSS validator to validate your files.

## Solution
