Enable/create a VLAN on a switch

Switch(config)# **vlan** *VLAN_ID*
Switch(config-vlan)# **name** *VLAN_name*

Example:
Switch(config)# vlan 100
Switch(config-vlan)# name Sales

Create an SVI (i.e. VLAN interface) on a switch

Switch(config)# **interface vlan** *VLAN_ID*
Switch(config-if)# **ip address** *IPAddr SubMask*

Example:
Switch(config)# interface vlan 100
Switch(config-vlan)# ip address 172.16.100.10 255.255.255.0

Put an interface into a VLAN on a switch

Switch(config)# **interface** *INT_ID*
Switch(config-if)# **switchport access vlan** *VLAN_ID*

Example:
Switch(config)# interface G0/0
Switch(config-if)# switchport access vlan 100

Creating a sub-interface on a router

Router(config)# **interface** *INT_ID.SUB_ID*
Router(config-if)# **encapsulation dot1q** *VLAN_ID*
Router(config-if)# **ip address** *IPAddr SubMask*

Example:
Router(config)# interface G0/0.100
Router(config-if)# encapsulation dot1q 100
Router(config-if)# ip address 172.16.100.1 255.255.255.0
