Project Diary - Software Engineering and Testing

Team Name: qwerty	Date: 28/02/25

Weekly Team Update

- **Who is present at today's meeting?** Danyil Tymchuk & Artem Surzhenko
- **Who is absent:** None
- **What each member completed since last week:**
    - **Danyil:** Created functional and non-functional requirements documentation, developed use case specifications, created project scope document, login register page using data from json file, create init connection to DB
    - **Artem**: Designed use case diagram, created walkthrough scenarios, worked on client documentation, refined project overview
- **Roles to be taken this week:**
    - **Danyil:** Database implementation and connection to web app
    - **Artem:** Entity Relationship Diagram refinement and UI mockups creation

Weekly Project Update

- **What is the current status of project?** Completed requirements analysis phase. Have basic PHP web pages and project documentation created. Database design in progress.
- **What was decided upon after today's lab?** Refactored ERD to include additional user attributes (name, bio, followers, following). Added media support to the posts table.
- **What was achieved during this week and during today's lab** Completed all core requirements documentation. Created draft ERD with three main tables (Users, Posts, Comments). Annotated use case specifications to identify entities and relationships.
- **What we agreed with supervisor/lab lecturer?** Focus on the three main entities for initial implementation. Prioritize core functionality over additional features.

Project plans for next phase

- **What will be done next?** Implement database schema in MySQL. CRUD . UI
- **When will the next task be done by?** By next week
